Friends of the Woodland Library

Dear Friends,

Thank you for your continued support of the building of a new library in the City of Woodland. Without your dedication, perseverance, and forward momentum, our community would lack a facility that serves so many.

As Mayor of the City of Woodland, I fully support and encourage the building of a new library. Our current facility is in need of expansion. The expansion would provide more space for children, adult, and community programs. The additional space would also allow the serving of more SWWA residents who currently are unable to use this much needed community resource.

I encourage you to continue building financial support from those in and around our community on the construction of a new Woodland library. Please call upon myself or City Council for support when needed!

Will Finn
Mayor, City of Woodland
